Watts, Sedan and Stone Hill Construction

40 Years of Building

Watts Construction, Sedan Construction and Stone Hill Construction span over three generations, beginning with Minor Watts Sr., to Minor “Mac” Watts Jr. and most recently, Minor Watts III.

It all began with Minor Watts Sr., in Fairfax, Va. In the 1960s he moved his family to Hampshire County, bringing his building and construction

experience with him. The senior Watts retired in 1989.

Most recently, Minor “Mac” Watts Jr. along with his son, Minor Watts III, built the new water department facility along Route 50 E. Over the years, they have built churches, fire departments, post offices, health departments and countless residential homes. Some of the subdivisions include Hickory Corner, Sleepy Meadows, and currently, Jordan’s Overlook, just off Route 29 N.

Whether it’s a commercial building, custom home, modular or metal building, they can build it to meet your budget. As a “hands-on” operation from start to finish, they can also assist with various financing options. Homes for sale starting at \$127,000.

You can reach Sedan Construction and Mac Watts at (304) 813-1222.

As for all the past and future customers, they say “Thank you for your business.”

Residential home built by Sedan Construction.

Sedan Construction is currently working on renovations of the Romney Volunteer Fire Department.
